

TARIK GÜLEZGİN

SOFTWARE ENGINEER

ABOUT ME

I'm a passionate software engineer. I enjoy tackling complex problems and building value-driven products through innovative solutions.

Technical background: I have advanced knowledge in Python, intermediate knowledge in Java, beginner-level experience in C/C++/C#, and basic knowledge of JavaScript. I also have advanced experience in HTML and CSS.

My career journey began in cybersecurity, moved on to embedded systems, and more recently I gained experience as an AI engineer. I'm currently working at Gopa Danışmanlık as an IT specialist and project assistant on an EU-funded project.

Alongside this, I work as a freelancer offering WordPress-based web development, data scraping with BeautifulSoup, and Python-based project development and support services.

My goal is to take part in diverse and challenging projects to make meaningful contributions to the world of technology.

EXPERIENCE

GOPA DANIŞMANLIK

April 2025 - Present

-Project Asistant | IT Specialist

- Managing project tracking and reporting, coordinating meetings, and handling documentation and archiving processes.
- Supporting communication and stakeholder management, and assisting with budgeting and procurement activities.
- Conducting data analysis to support decision-making processes.
- Providing consultancy on IT infrastructure, website setup, server room installation, software requirements, and software procurement.

FREELANCE

February 2023 - Present

-Web Scraper

- For Shipsland Fulfillment, I developed and executed web scraping tasks to collect and analyze data from e-commerce platforms such as next.co.uk, Amazon, and AliExpress.
- I created detailed reports based on the extracted data to support business operations and decision-making.

-Web Developer

- I developed the website of Maklidaş, a company affiliated with Malatya Metropolitan Municipality. In addition, I designed and built websites for a law consultancy firm, a construction company, and a car rental business using my front-end development skills. I currently continue this work as a side business and actively expand my market on my own initiative.

-Software Consultant

- Providingsupportto professionals across various companies and institutions by addressing software-related inquiries and sharing technical expertise.

-Python Developer

- My primary expertise is in Python programming. I actively seek freelance opportunities on online platforms, focusing on development, code optimization, bug fixing, and project implementation using Python.

-Medical Representative

- I continue to work as a Medical Representative, a role I started as a part-time job during my university years. I facilitate service agreements between doctors and pharmaceutical companies such as Ashfield and Taymed, and coordinate contract negotiations with hospitals.

-Artificial Intelligence Engineer

- As an Artificial Intelligence Engineer Intern, I developed algorithms for data analysis and worked on improving decision-making systems through various machine learning and AI projects.
- I worked with large international datasets on agricultural commodities and logistics pricing, and developed an AI-powered query system that eliminated the need for SQL queries. This project utilized AI agent technologies.

BAŞARAN İLERİ TEKNOLOJİ ASELSANNET BAYİ

August 2023 - October 2023

-Image Processing Engineer Intern

- My second internship was at Başaran İleri Teknoloji, a branch of Aselsan located in Malatya. I worked in the telecommunications field and developed a small-scale image processing and facial recognition project, considering the operation of surveillance cameras. During this process, I gained experience not only in technical skills but also in communication and project management.

TÜMER MÜHENDİSLİK

August 2022 - September 2022

-Embedded Systems Engineer Intern

- My first internship experience took place at Tümer Engineering, located in Hacettepe Technopolis.
- I worked on an AHRS system project for avionics systems, specifically for UAVs, in the defense industry. This project was a challenging and technically complex process, but through this experience, I developed my problem-solving skills and gained a deeper understanding of the importance of teamwork.
