PROFESSIONAL SUMMARY

Software engineer with hands-on experience across applied AI/ML, embedded systems, and data engineering, currently pursuing a Master's degree in Artificial Intelligence and Robotics. Builds machine learning solutions using deep learning architectures (CNN, RNN, Transformer-based models) and agentic AI/RAG pipelines, and delivers high-volume data pipelines using Python, Scrapy, Selenium, BeautifulSoup, and PostgreSQL. Combines this technical foundation with project coordination experience from an EU-funded IT project and an active freelance web development practice. Looking to bring applied AI, machine learning, and data engineering skills to challenging, production-focused projects.

CORE SKILLS

Programming: Python, HTML/CSS, Arduino, Java, C/C++/C#, JavaScript

AI / Machine Learning: TensorFlow, PyTorch, Scikit-learn, Hugging Face, BERT, CNN/RNN/Transformer architectures, NLP, RAG, LangChain, OpenCV/YOLO, Large Language Models (LLMs), Generative AI, Agents, Claude Code

Data & Databases: Pandas, NumPy, Matplotlib, JSON, SQL/NoSQL, MySQL, MongoDB, PostgreSQL, BigData, Vector Databases

Data Collection & Automation: BeautifulSoup, Scrapy, Selenium

Other Tools: WordPress, Git/GitHub, Docker, Windows, Kali Linux

PROFESSIONAL EXPERIENCE

GOPA DANIŞMANLIK

April 2025 – Present

Project Assistant | IT Specialist

- Coordinate project tracking, reporting, and documentation for an EU-funded project, supporting stakeholder communication and procurement activities.
- Perform data analysis to support project decision-making and budgeting processes.
- Advise on IT infrastructure needs, including website setup, server room installation, and software procurement requirements.

FREELANCE — WEB SCRAPING (SHIPS LAND FULFILLMENT)

February 2023 – Present

Web Scraper

- Build and run weekly web-scraping pipelines (Python, Scrapy, Selenium, BeautifulSoup) across e-commerce platforms (Amazon, AliExpress, next.co.uk), processing roughly 500,000 products per week.
- Deliver structured, recurring data reports that support business operations and decision-making.

FREELANCE — WEB DEVELOPMENT

February 2023 – Present

Web Developer

- Designed and built 5 client websites — including a company affiliated with Malatya Metropolitan Municipality, a law consultancy firm, a construction company, and a car rental business — and provided technical support on a comparable number of additional development projects.
- Grew this freelance practice independently into an ongoing side business, sourcing and managing client relationships directly.

FREELANCE — SOFTWARE CONSULTING

February 2023 – Present

Software Consultant | Python Developer

- Provide Python development, code optimization, debugging, and technical consultancy to professionals and companies across various industries.
- Deliver freelance Python projects sourced through online platforms, covering development, optimization, and implementation support.

BIGOEN

September 2024 – March 2025

Artificial Intelligence Engineer Intern

- Worked within a 5-person engineering team to develop machine learning algorithms — leveraging deep learning architectures such as CNN, RNN, and Transformer-based models — for decision-support systems using large-scale international datasets on agricultural commodities and logistics pricing.
- Built an agentic AI system with a natural-language (RAG-based) query interface, achieving high accuracy while removing the need for manual SQL queries.

BAŞARAN İLERİ TEKNOLOJİ (ASELSAN NET BAYI)

August 2023 – October 2023

Image Processing Engineer Intern

- Developed a small-scale image processing and facial recognition project for surveillance camera applications in the telecommunications field.
- Gained cross-functional experience in communication and project management alongside technical implementation.

TÜMER MÜHENDİSLİK

August 2022 – September 2022

Embedded Systems Engineer Intern

- Contributed to an AHRS (Attitude and Heading Reference System) project for UAV avionics systems in the defense industry.
- Developed problem-solving skills while working through a technically complex embedded systems process.

EDUCATION

Firat University — Master's Degree, Artificial Intelligence and Robotics

In Progress

Firat University — Bachelor's Degree, Software Engineering

2025
